Statement on the restriction of the use of certain hazardous substances (RoHS)

Dear Sirs,

we herewith confirm, that our components are completely free of cadmium, mercury, chrome (VI)-compounds, polybrombiphenyl (PBB), polybromdiphenylether (PBDE), decabromdiphenylether (Deca-BDE), di(2-ethylhexyl)phthalate (DEHP), butylbenzylphthalate (BBP), dibutylphthalate (DBP), diisobutylphthalate (DIBP).

As far as these prohibited substances are concerned, all our products correspond completely to the current RoHS-guide lines (2011/65/EC).

Our products contain merely lead compounds at the soldering point. In this application it is a matter of high-temperature-soldering, which is excepted from the ban at the moment.

Journal of the European Union:

L 174/103 from 01.07.2011 point 7a, except high temperature lead

L 174/105 from 01.07.2011 point 33, lead in solders for the soldering of thin copper wirres

All pins of our products are pure tinned galvanized since 2002. Therefore we guarantee, that no pollution will arise at any further soldering process, while using our lead compound.

Consequently all our products are corresponding to the above mentioned EU-guideline and can be used leadfree in all other applications.

In case of any further questions or for more information, please feel free to contact us again.

Best regards
HAHN GmbH & Co. KG

i. A. Gregor Schlereth
