

The Embedded Family of Projected Capacitive Solution

A Complete Scalable Family of Touch Solution

• 10 Film/Film sensor available from 10.1"W up to 21.5"W with same COF design

 Standard Family of new transparent cover lens with 1.1 and 1.8 mm, Black and White Cover lens 3 and 6 mm.

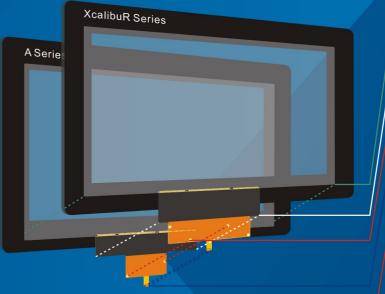

- A unique Chip On Flex Design powered by EETI IC controller series
 - A line series up to 2 fingers (7200 IC based)
- XcalibuR line up to 10 fingers (3000 IC based with 32V)
- 6 pin 1 mm pitch, USB, I2C and RS-232 interface
- Customer can switch between COF A and X, with compatible design

- Customized firmware with different options such as: Frequency Hopping, Palm Rejection, Water Rejection, Air Gap, Light frequency cutting
- Standard Adapter Box for easy and fast connection
- 4 sets of standard Cables, two USB type and two RS-232 type

The Projected Capacitive Kit

XcalibuR Series **VS A Series**

Slimmer ITO Film Design

Same COF Film Width

Same position of 2 Holes

Same Tail Position & Pinout

Unique Adapter Box for all sizes

USB RS-232 Cables

Rocktouch: Time to Market Matters!

CONTACT INFO

Rocktouch the Embedded Family of Projected Capacitive touch screen Sensor

Since Rocktouch step into Projective Capacitive Market the concept was very clear: bring innovation to customer and keep customer R&D cost low, no matter how much our technology will evolve during the years.
For this reason Rocktouch A line and new XoalibuR line are fully compatible and customer can switch between the two without any mechanical re design.

If customer wish to customize the front cover lens, due of our very flexible F/F/G technology, they can pay the tooling of the front glass and we can produce a customize solution for them with very small tooling investment.

	all our standard part numbers. STANDARD COVER LENS AVAILABLE
